EXPERIENCE

Senior UX Engineer • August 2023 - present

Roku, San Jose, CA

UX Engineer • April 2022 - July 2023

- Designed and developed a tool for designers to create prototypes on the web and view on a Roku TV channel for user testing
- Created a Figma plugin that bulk generates and exports optimally-sized assets
- Built a website for the UX Engineering team that showcases internal tools, prototypes, project schedules, and prototype assessment quizzes
- Developed a web interface that allowed designers to control TV remote backlighting settings and integrated with Arduino hardware
- Created many prototypes using Vue of TV experiences for user testing and demonstrations
- Wrote UX Engineering team newsletters that recapped team accomplishments and was sent to the entire UX organization

Senior Design Technologist • August 2021 - April 2022

Intuit, Mountain View, CA

Design Technologist • June 2018 - July 2021

- Developed a drag-and-drop prototyping tool for designers that leveraged Intuit Design System components and supports custom data and logic
- Created a Figma plugin used by more than 150 Intuit designers that transforms designs to dark mode, supplies legally approved placeholder content, and exports into an animation tool
- Partnered with designers to create React prototypes of new QuickBooks features for user testing
- Built a proof of concept prototype that served as the basis for production code, accelerating the development and release process

EDUCATION

Bachelors in Computer Science • 2014 - 2018

University of Wisconsin-Madison

Minored in Art and Digital Studies

TOOLS & SKILLS

Technical

- React, Vue, JavaScript, Typescript, CSS animations, Styled Components, Figma Plugin API
- Node.js, Express, AWS Dynamo DB, AWS S3, Firebase

Design

- Figma, designing internal tools, video animation, conducting user interviews, gathering user feedback, project management
